Classes by Ahli. Intuitive development is a natural course of action and the next stage of evolution for humankind. Common prayers and affirmations, reading books and visualization can help you develop your senses to better communicate with your spiritual guides, discern the right course of action in all matters, realize the true nature of life's experiences, know truth from deception, and quickly resolve and overcome life's challenges. Discovering your purpose in life is easy when you're guided by using your gifts to discover you have limitless potential. ***"Manipulation of universe energy is ever in accordance with the personal will and the all wise mandates of the Universal Creator."*** quote from *The Urantia Book*
